

Acrylic Reverse Channel Letters Diagram

CNC engraved acrylic letters shell can be some special 3D effects, such as profile bevel, chamfer, etc.

CNC engraved acrylic Letters shell

LEDs

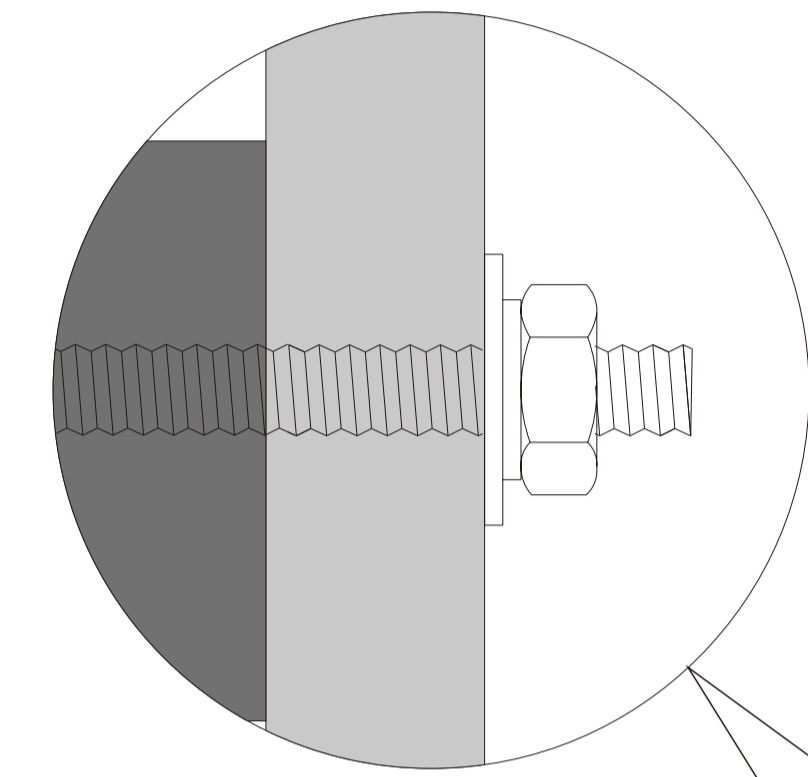

Cables

The front and parts of the border near the front be painted

Stud bolts to fix the letters on the backing wall

Backing wall

Power distribution box with AC transformer inside

If the backing wall is thin and construction can be performed on the another side of the back wall, please use nuts and washers to fix the stud bolts on the back wall, so that the signage can fix on the backing wall more secure.

The AC transformer emits heat during work. We recommend that the AC transformer be placed in a ventilated position or in a power distribution box with air vents to facilitate heat dissipation, to make the AC transformer have a better service life.
